

Refinement Notes

In order to make it possible to implement as much as possible within the remaining time of the internship, the work has been simplified and split into epics and smaller issues. Below is a wireframe from version 7 as well as some notes from the feedback received during the review that affects the implementation.

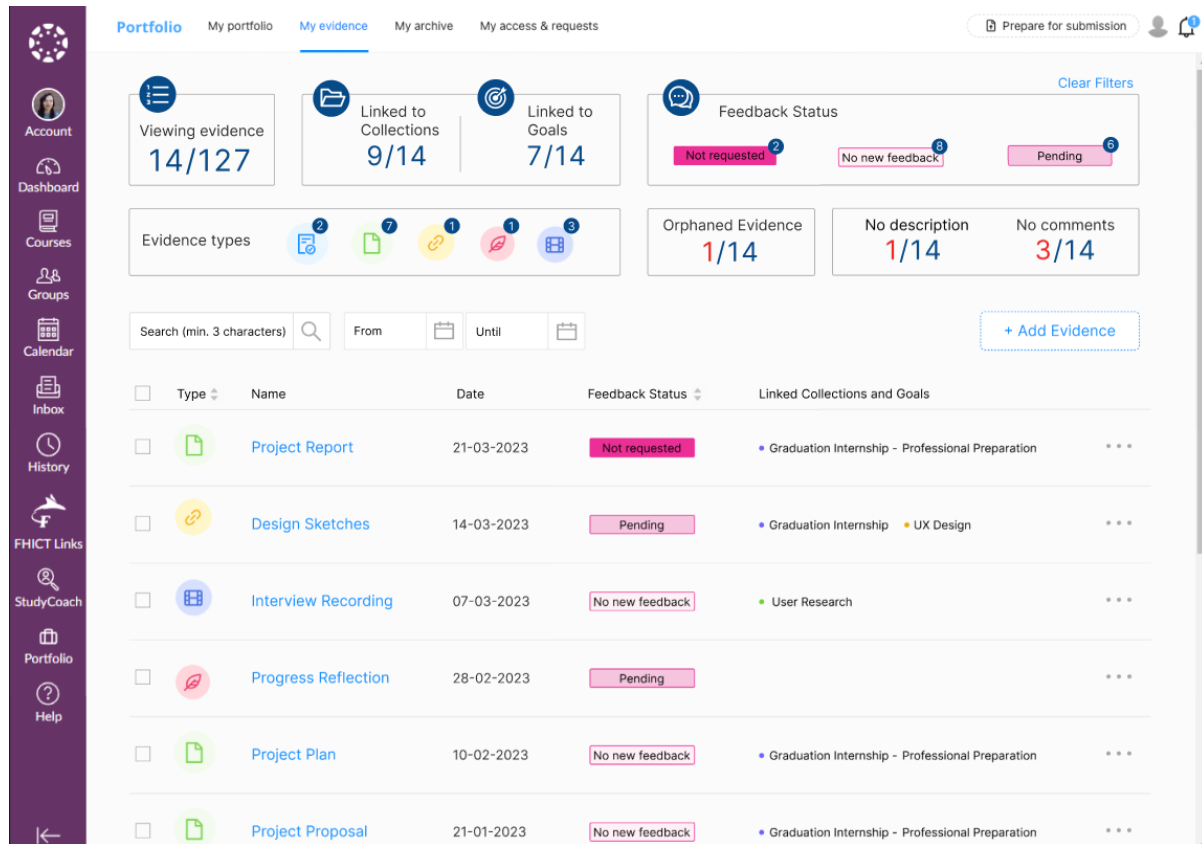

Image 1. V7 that was approved during review meeting.

| Type | Name | Date | Feedback Status | Linked Collections | Linked Goals |
|------|------|------|-----------------|--------------------|--------------|
|------|------|------|-----------------|--------------------|--------------|

Image 2 Example of a column headers to be implemented by the student.

Refinement Session 1

- Smart Table
 - Create date column with filter (use correct name)
 - Feedback Status column with sorting option
 - Kebab menu per row (with manage goals & collections and delete options)
 - Make “+Add Evidence” a ghost button (not primary)
 - Create Linked Goals column with a filter option (drop down with a list)
 - Redo the Linked Collections column with a filter option (drop down with a list)
 - Add tooltip of evidence Type icons to indicate the type in text on hover
 - Alternate colours between rows to improve readability of large amount of evidence

The refinement is completed using Zenhub, a tool that helps keep track of tickets. It is convenient due to its integration with GitHub. Below is an image of the first refinement board in progress.

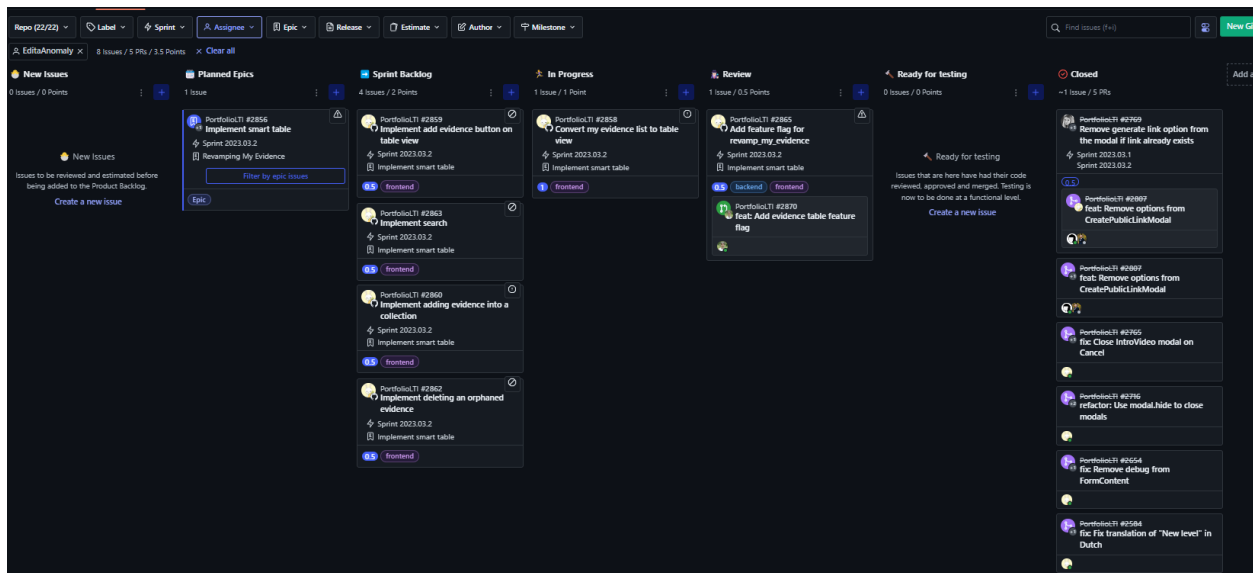

Image 3. First refinement session results in Zenhub.

Refinement Session 2

The wireframe shows a user interface for managing evidence. On the left is a vertical sidebar with icons for Account, Dashboard, Courses, Groups, Calendar, Inbox, History, FHICT Links, StudyCoach, Portfolio, and Help. The top navigation bar includes 'Portfolio' (selected), 'My portfolio', 'My evidence' (selected), 'My archive', and 'My access & requests'. On the right of the top bar are buttons for 'Prepare for submission' and a user profile icon.

The main content area features several summary cards: 'Viewing evidence 14/127', 'Linked to Collections 9/14', 'Linked to Goals 7/14', and 'Feedback Status' (with sub-cards for 'Not requested', 'No new feedback', and 'Pending'). Below these are 'Evidence types' (with icons for document, folder, link, etc.), 'Orphaned Evidence 1/14', 'No description 1/14', and 'No comments 3/14'. A search bar and filters are present, along with a '+ Add Evidence' button.

| Type | Name | Date | Feedback Status | Linked Collections | Linked Goals |
|----------|---------------------|------------|-----------------|----------------------------------|--------------------------|
| Document | Project Report | 21-03-2023 | Not requested | Graduation Internship | Professional Preparation |
| Link | Design Sketches | 14-03-2023 | Pending | Graduation Internship, UX Design | |
| Folder | Interview Recording | 07-03-2023 | No new feedback | User Research | |
| Document | Progress Reflection | 28-02-2023 | Pending | | |
| Document | Project Plan | 10-02-2023 | No new feedback | Graduation Internship | Professional Preparation |
| Document | Project Proposal | 21-01-2023 | No new feedback | Graduation Internship | Professional Preparation |

Image 4. Updated evidence wireframe to be implemented.

This wireframe shows the progress made on the Evidence Page. The sidebar and top navigation bar are similar to the previous version, but the 'My evidence' tab is now selected. The main content area includes a search bar, a '+ Add evidence' button, and a table of evidence items.

| Type | Name | Creation date | Latest feedback status | Linked collections | Actions |
|------|-------------------------|---------------|------------------------|---|---------|
| Link | Performance Methods | 31/03/2023 | Without feedback | 2. Augmented Reality, 1. 24 Ways to Communicate with Another Phone, 4. Reactive Soundscape, Individual Project, Documentation | |
| Link | Software Architecture | 31/03/2023 | Without feedback | Group Project | |
| Link | Database Modularization | 31/03/2023 | Without feedback | 2. Augmented Reality | |
| Link | Template Analysis | 31/03/2023 | Without feedback | 3. Machine Learning, Bleep | |
| Link | Web Development | 31/03/2023 | Without feedback | 4. Reactive Soundscape | |
| Link | Global Management | 31/03/2023 | Without feedback | | |
| Link | Template Testing | 31/03/2023 | Without feedback | 5. TBD | |

Image 5. Progress made on Evidence Page by the time the second refinement took place.

2. EPIC: Dashboard

- Add a new feature flag for the dashboard
- Define the shape of the response object (that API will return)
- Register in API documentation
- Define the path for the request
- Create an endpoint on the request path that provides the response object with test data inside
- Create Evidence Counter (only total evidence) [Frontend](#)
- Make a query for the total evidence of the user and pass it to the response object
- Plan a session with Elise to improve the look of the dashboard and make it more AntD
- Linked to Collections Counter [Frontend](#)
- Make a query for the evidence linked to collections and pass it to the response object
- Evidence Type counters [Frontend](#)
- Make a query for each evidence type and pass it to the response object
- Feedback Status Counters [Frontend](#)
- Make a query for the evidence per feedback status and pass it to the response object
- Orphaned Evidence Counter [Frontend](#)
- Make a query for the orphaned evidence and pass it to the response object
- Evidence with No Description Counter [Frontend](#)
- Make a query for the evidence with no description and pass it to the response object
- Evidence without comments Counter [Frontend](#)
- Make a query for the evidence without comments and pass it to the response object
- Check how long the request is taking? Optimize.
- Make it responsive! And accessible?

Refinement Session 3

Reorganized EPICs into the following:

Convert table - change what we had as a list into the table view

Improve table - add new things and improvements to the table

Dashboard – separate feature flag with all dashboard things

Convert table:

- Manage Collections for an Evidence

Improve table:

- Display Goals that are Linked per Evidence
- Add filtering on type, collection, feedback, goals and date
- Add sorting

Best case scenario:

EPIC: Interactive Dashobard

- Show only Evidence that is Linked to Collections in the table
- Show only Evidence that is Linked to Goals in the table
- Filter table per Evidence Type
- Filter table per Feedback Status
- Show only Orphaned Evidence in the table
- Show only Evidence with No Description in the table
- Show only Evidence without comments in the table
