**Dear student,**

Based upon the view that the assessors have on the progress of your graduation internship, and based upon the feedback from the company mentor and your own reflection this form is filled in. For each of the learning outcomes one of the following levels is indicated with additional substantiation.

Undefined: the student has not yet undertaken activities to demonstrate the learning outcome.

Orienting: the student has made a start and explored the possibilities to demonstrate the learning outcome.

Beginning: the student has taken the first steps and carried them out which contribute to demonstrating the learning outcome.

Proficient: the student has demonstrate the learning outcome several times. The student will demonstrate the learning outcome at a sufficient level, if the development continues in this way.

Advanced: the student has shown several times to work on this learning outcome with good results. The student has performed above expectations and has focused on continuous improvement. The student will demonstrate the learning outcome at a more than sufficient level, if the development continues in this way.

|   | <b>Learning Outcome</b>       | <b>Level*<br/>(U, B, P, A)</b> | <b>Substantiation/Feedback</b>  |
|---|-------------------------------|--------------------------------|---|
| 1 | Professional duties           | P                              | You reach everything that can be expected from a student in the user interaction profile... and more: with a background in software engineering you want to go full-stack. Don't overwork yourself on that, but you seem to manage and are capable of doing it all. Nice! |
| 2 | Situation-Orientation         | P                              | You got yourself into the company real soon and adapted to the changes in mentors easily (although it was not easy)   |
| 3 | Future-Oriented Organisation  | B                              | You know what you want, although you sometimes doubt yourself in it. You function as a professional as far as I can tell.   |
| 4 | Investigative Problem Solving | P                              | Good critical view on things, supported by research. Please show me some more documents in between, so I know for sure  |
| 5 | Personal Leadership           | P                              | You take the lead in your project and stick to your own planning. You function well in the team.  |
| 6 | Targeted Interaction          | P                              | You consult a lot of people and that's a good thing.  |

\*choose from **U**ndefined, **B**eginning, **P**roficient, **A**dvanced

## Appendix: Explanation about the learning outcomes

1. Professional Duties: You carry out the professional duties on a bachelor level resulting in professional products in line with the IT-area you are working in.

*Clarification:*

- Professional duties on bachelor level = All or a subset of the activities Analysis, Design, Realize, Advise, Manage&Control on professional level. As a reference, 1) use the HBO-I framework<sup>1</sup> on proficiency level 3, 2) the level as required in OE6 or OE7 that relates to the IT field, 3) the expectation in the professional workfield related to IT field of the graduation project.
- Professional products: end products and other products as a result of the professional duties
- In line with the IT-area = You deliver professional products that are characteristic for the IT area of your project. E.g., a software architecture in full stack software development. On a general level the IT areas are defined by the 5 architectural layers of the HBO-I framework (User Interaction, Organizational Processes, Software, Hardware Interfacing, Infrastructure), or a more specific level as a subset or combination of the architecture layers (like cyber security or web development).

2. Situation-Orientation: You apply your previously acquired knowledge and skills in a new and authentic context to deliver relevant and valuable results for the project and company.

*Clarification:*

- Apply your previously acquired knowledge = You adapt to the processes and way of working of the company
- Relevant and valuable = Your work is relevant for one or more persons and creates value (e.g., in terms of upward TRL transition)
- New and authentic context = you work in a methodological and structured way in a context where approach and solution area are open, with multiple stakeholders and multiple IT areas combined.

3. Future-Oriented Organisation: You explore the organisational context of your project, make business, sustainable and ethical considerations and manage all aspects of the execution of the project.

*Clarification:*

- organisational context – you identify the business domain and stakeholders of the project and know its business legitimisation.
- business, sustainable and ethical factors – you take into consideration business, sustainable development and ethical aspects in your judgement process using standards or methods/tools (e.g. TICT).
- manage execution – you create a project plan and monitor your project including the research activities, time, money, risks and the quality of the solution which is valuable for the organisation.

4. Investigative Problem Solving: You take a critical look at your project from different perspectives, identify problems, find an effective approach and arrive at appropriate solutions.

*Clarification:*

- Identify problems - Throughout all phases of the project, initially by identifying the problem/opportunity of the client, defining the main scope of the project and formulating the related research questions, and during the project by identifying newly encountered problems/challenges and formulating more in-depth or detailed research questions.
- Different perspectives and effective approach – you use a variety of research strategies, methods and activities (reference: [https://ictresearchmethods.nl/The\\_DOT\\_Framework](https://ictresearchmethods.nl/The_DOT_Framework)) in a structured way in order to find justified answers to your research questions.
- Appropriate solutions – you use the results from your research to create valuable solutions and validate these with the relevant stakeholders.

---

<sup>1</sup> As described in: HBO-i Domeinbeschrijving 2018, HBO-I stichting, Amsterdam.

5. Personal Leadership: you are entrepreneurial around your projects and personal development, you pay attention to your own learning ability and keep in mind what kind of IT professional and/or what type of positions you aspire to.

*Clarification:*

- Entrepreneurial means that you take the lead in your own project, both planning as well as content wise.
- Paying attention to your own learning ability means that you can reflect on your own actions, ask and receive feedback on your actions and look for further opportunities and possibilities that flow from that feedback and that you are aware of your development as an IT professional.
- You know which role you envision in the IT-landscape and what role you play in a team.

6. Targeted Interaction: You determine which partners play a role in your project, collaborate constructively with them and communicate appropriately to achieve the desired impact.

*Clarification:*

- Communicate appropriately means that you make sure that your communication has the right impact and execution.
- Partners are the different stakeholders in the project to which you pay attention to and whose interest in the project are clear to you.
